## Description

Zorbas is a High Performance Computing (HPC) system, dedicated to bioinformatics applications for non-model species and ecological data analysis

## Software

- More than 200 state-of-the-art software suites support non-model organism next-generation sequencing data, environmental -omics, large-scale ecology, as well as biodiversity data analyses.
- Emphasis on pipeline parallelization and containerization (mainly Singularity-based).

## Applications/Analyses

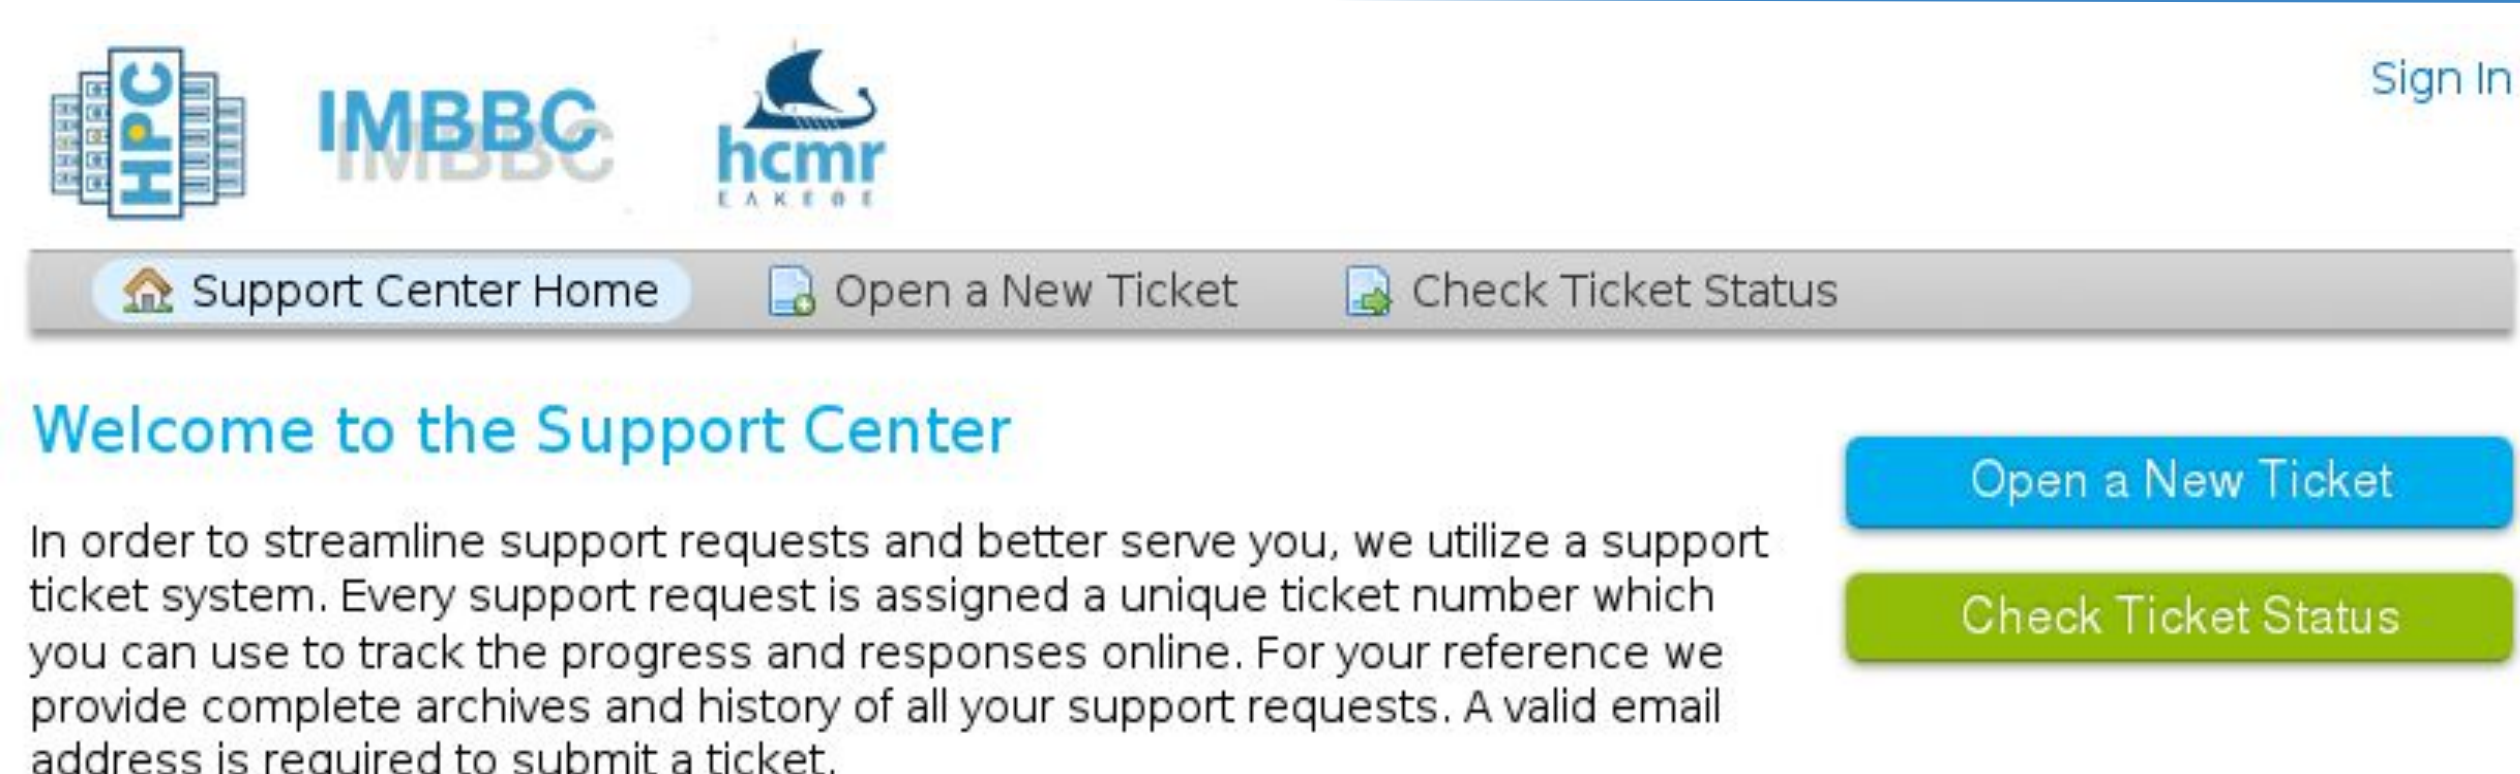

- Read pre-processing
- De novo assembly
- Gene annotation
- Variant discovery
- Mapping
- Differential expression
- Orthology analysis
- Phylogenomics
- Population genomics
- Metabarcoding
- Biodiversity index calculation
- Ecological data analysis

## Usage/Services

- > 50 users (Greece, Italy, Spain etc)
- 2 hpc system administrators
- ~20000 submitted jobs in 2019

## Helpdesk Site

## Resources Monitoring Site

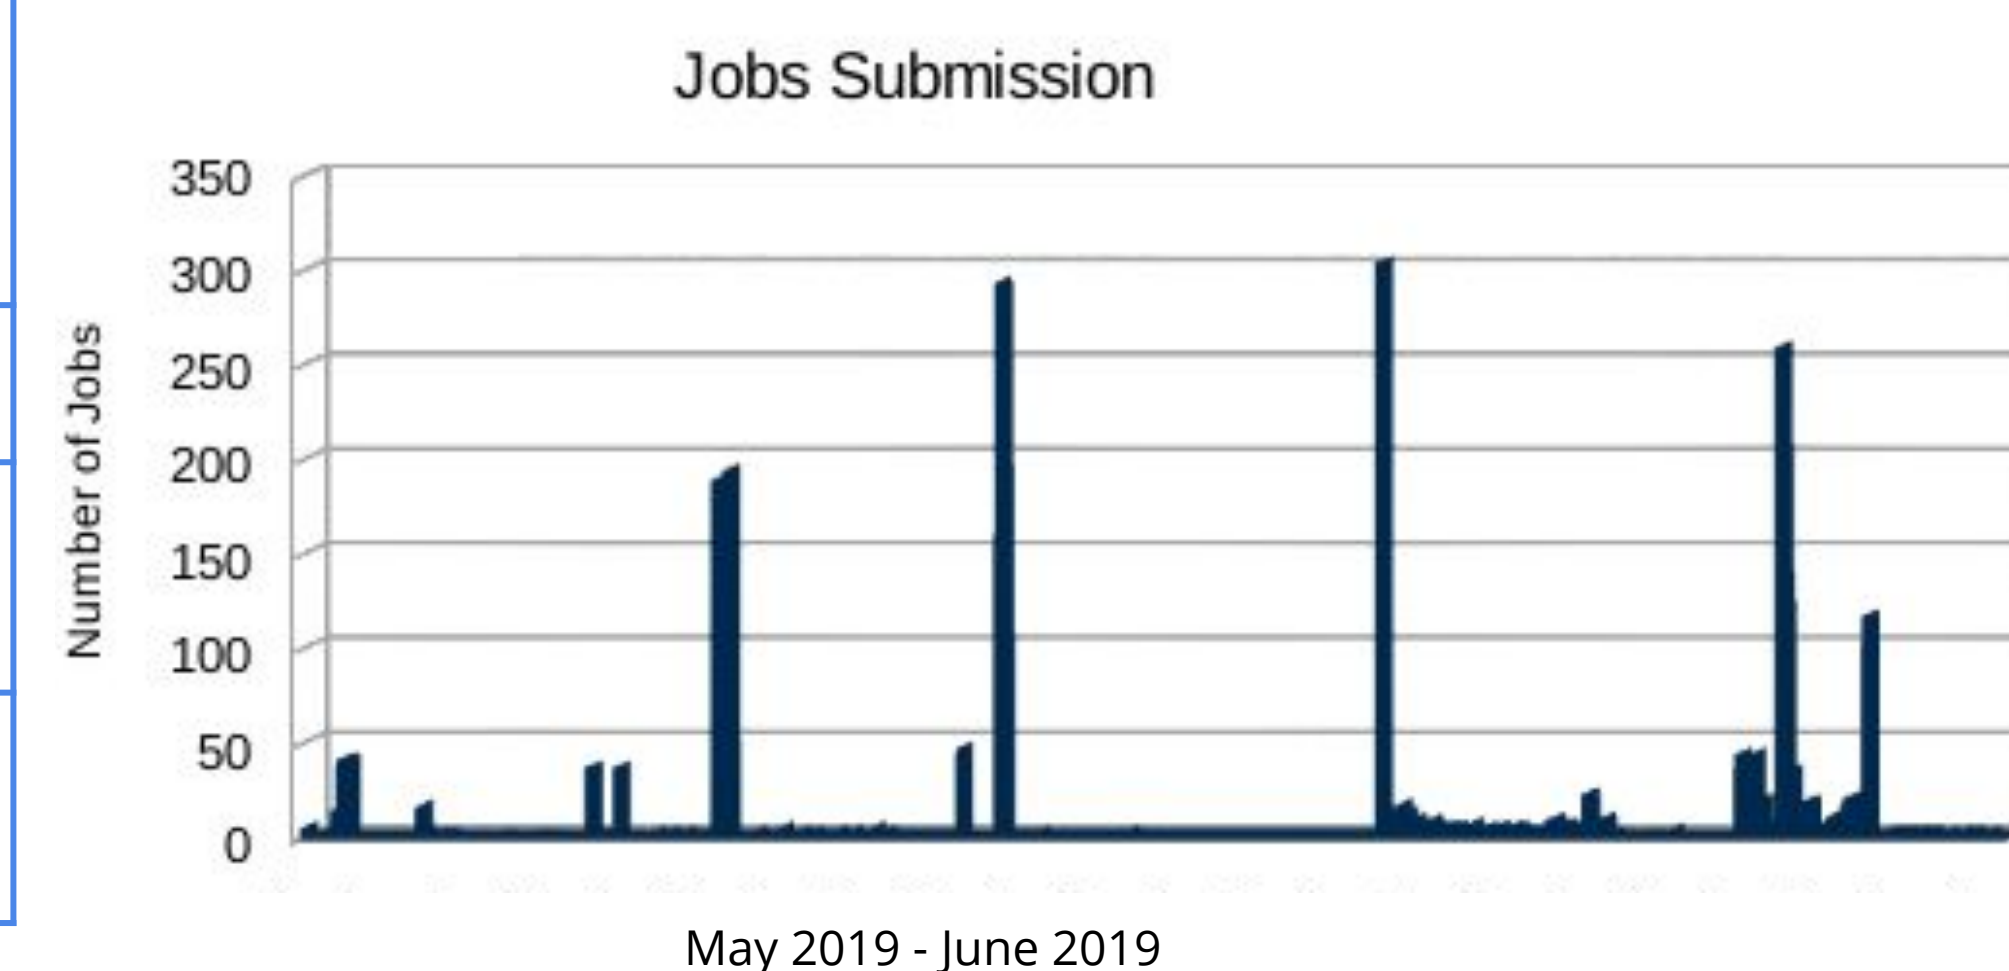

BATCH - SCHEDULING TABLE				
<< Go To Week Before		Go To This Week		
Nodes	Mon Oct 14	Tue Oct 15	Wed Oct 16	Thu Oct 17
Node 1	project: aquaexcel II	project: aquaexcel II	project: aquaexcel II	project: aquaexcel II
Node 2	project: MedUNITS	project: MedUNITS	project: MedUNITS	project: MedUNITS
Node 3				
Node 4				
Node 5				
Node 6				
Node 7				
Node 8

Node 10				
Node 11				
<< Go To Week Before		Go To This Week		
Full-Node	Full-Node	Partial	Partial	Maintenance
Part-Time	Full-Time	Time	Time	

## Funding

The establishment of Zorbas has been funded by the MARBIGEN (EU REGPOT) project, LifeWatchGreece and CMBR (Centre for the study and sustainable exploitation of Marine Biological Resources) Research Infrastructures (ESFRIs).

2019 Memory Utilization Distribution	Number of Jobs
<20 GB	18330
>=20 GB and <100GB	184
>=100GB and <=640GB	34

## Ongoing Collaborations

Ongoing collaborations with the LifeWatch ERIC, EMBRC ERIC, and the ELIXIR Research Infrastructures aim at sharing resources and accumulated expertise to the broader pertinent Hellenic and European bioinformatics and biology communities.
